PROFESSIONAL SUMMARY

Frontend-focused developer with strong expertise in **React.js, JavaScript (ES6+), Tailwind CSS, Redux Toolkit, and REST API integration**. Passionate about building performant, responsive, and visually polished user interfaces with clean component architecture. Complements frontend work with growing backend knowledge in **Node.js, Express.js, and MongoDB** — capable of building and consuming full-stack MERN applications end-to-end. Deployed production-style projects including a full-stack Job Portal with role-based authentication and AI-powered features. Immediate joiner seeking a **Frontend Developer, React.js Developer, or Junior Full-Stack role**.

TECHNICAL SKILLS

Frontend	React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Sass, Responsive Web Design, Cross-browser Compatibility
UI & State	Redux Toolkit, Context API, Component Architecture, Axios, REST API Integration
Backend	Node.js, Express.js, RESTful API Design, JWT Authentication, CRUD Operations (Intermediate / Learning)
Database	MongoDB, MySQL (Intermediate / Learning)
Dev Tools	Git, GitHub, VS Code, Postman, Netlify, Render

PROJECTS

Job Portal Application

[jobist.netlify.app](#) | [github.com/sathyan-a-wbd/job-portal-fullstack](#)

[React.js](#) · [Redux Toolkit](#) · [Node.js](#) · [Express.js](#) · [MongoDB](#) · [JWT Auth](#) · [Tailwind CSS](#)

- Engineered a production-grade MERN stack Job Portal with **role-based JWT authentication** (Employer / Job Seeker), protected API routes, and session management using Express.js and MongoDB.
- Architected RESTful backend handling **job posting workflows, multi-stage application pipelines, applicant status tracking**, and dynamic data operations across 10+ API endpoints.
- Built full-featured employer dashboard with candidate profile rendering (skills, education, experience, resume) and **applicant filtering and shortlisting** capabilities.
- Integrated **AI-powered professional summary generation** feature enabling users to auto-create optimized career profiles — deployed live on Netlify with full production CI/CD.

College Management System

[github.com/sathyan-a-wbd/College-Management-System](#)

[HTML5](#) · [CSS3](#) · [JavaScript](#) · [PHP](#) · [MySQL](#)

- Developed a full-stack web application managing **student records, administrative workflows, and academic data** with PHP backend and MySQL relational database.
- Implemented CRUD operations for student enrollment, course management, and attendance tracking with a **role-separated admin and student interface**.

Portfolio Website

[sathyandevportfolio.netlify.app](#) | [github.com/sathyan-a-wbd/sathyan-portfolio](#)

[React.js](#) · [Tailwind CSS](#) · [Responsive Design](#)

- Designed and deployed a personal developer portfolio with **smooth animations, responsive layout, and optimized performance** across all device sizes.

EDUCATION

Bachelor of Computer Applications

2022 – 2025

TMG College of Arts & Science, University of Madras

Higher Secondary Certificate (HSC)

2020 – 2022

GHSS Pazhampettai

Secondary School Leaving Certificate (SSLC)

2019 – 2020

GHSS Pazhampettai

Languages: Tamil (Fluent) · English (Intermediate)

Available: Immediate Joiner · Open to Remote / Relocation
